Why ESHD?

Culture

Choose to make a real difference in the world. SOE students, faculty and staff are committed to creating a more equitable society. We believe educators are liberators because knowledge is transformative. ESHD students are prepared to transform our system of education, society and the lives of our youth - which means making the world a better place.

Career

Choose a degree that will help you get a job. Educators are in great demand in and out of the classroom. ESHD students are well prepared to get their teaching credentials or to become school psychologists, counselors, speech pathologists and more. There are also opportunities in special education, social work, nonprofit management, public policy, research, healthcare, arts, early education, youth services, adoption services and so much more.

College

Choose a college that is there for you. UCR is a big, state university with all the great resources of a major, public university. But the SOE operates more like a small college that gets to know its students and supports each student uniquely based on the needs of the student. From writing support to professional development to student engagement, the SOE is here for you!
