

Master of Education Applied Behavior Analysis 2020-2021

The M.Ed. emphasis in Applied Behavior Analysis (ABA) provides intensive instruction, practica, and supervision in the use of behavior principles to support the behavioral health of children and adults. Assessments and interventions that are rooted in ABA can be used to support individuals with a wide range of learning and behavior problems, including those with autism and other developmental disabilities. The courses in this program are aimed at individuals who wish to provide behavioral support services to students in educational and clinical settings, including special educators, school psychologists, paraprofessionals, and other behavioral health providers.

This emphasis allows students to complete the requirements for a master's degree in Applied Behavior Analysis in four academic quarters. Students accepted for study must begin the program during the fall quarter.

Coursework

Requires 68 units. Student must complete the courses listed below.

Required Courses

EDUC 217: Single Case Experimental Design
EDUC 231A: Introduction to Applied Behavior Analysis
EDUC 231B: Behavioral Interventions in Schools
EDUC 231C: Foundational Principles of Applied Behavior Analysis
EDUC 235: Ethics for Applied Behavior Analysis
EDUC 236A: Behavior Analytic Skills Development – Level 1
EDUC 236B: Behavior Analytic Skills Development – Level 2
EDUC 236C: Behavior Analytic Skills Development – Level 3
